

7 Nov 2024

<https://github.com/EESSI/meetings/wiki>

Agenda

- Quick introduction by new people
- Progress update per EESSI layer
- Update on EESSI production repository `software.eessi.io`
- Modulefile for initializing the EESSI stack
- Update on EESSI documentation + test suite + build-and-deploy bot
- AWS/Azure sponsorship update
- Upcoming/recent events
- Q&A

Quick introduction by new people

New people on the call: feel free to introduce yourself!

- Who are you, where do you work, on what?
- Why are you interested in the EESSI project?
- Are you planning to actively contribute,
and if so, to which aspect(s) of the project?

Progress update: filesystem layer

- Client container was updated to RHEL8 ([PR #199](#))

Progress update: compatibility layer

- No significant updates
- Discussion / ideas for compatibility layer of next EESSI version:
<https://gitlab.com/eessi/support/-/issues/56>
 - Installation of `foss/2024a` requires this new version, as it needs OpenSSL 3 in the compatibility layer (see <https://github.com/EESSI/software-layer/pull/685>)
 - Probably makes sense to wait until EasyBuild 5.0 is released?

Progress update: software layer (1/3)

Highlights of recently merged PRs:

- Additional software: EasyBuild 4.9.3 & 4.9.4 ([PR #703](#) & [PR #740](#)), bio-packages ([PR #706](#)), ReFrame 4.6.2 ([PR #708](#)), GROMACS 2024.3 ([PR #709](#)), LAMMPS 29Aug2023 ([PR #725](#)), waLBerla 6.1 ([PR #779](#))
- Additional software zen4: LAMMPS 2Aug2023 ([PR #705](#)), JupyterNotebook 7.0.2 ([PR #713](#)), PyOpenGL 3.1.7 ([PR #751](#)), SAMtools 1.18 ([PR #757](#)), OSU-Micro-Benchmarks 7.1-1 ([PR #759](#))
- Additional software A64FX: LAMMPS 2Aug2023 ([PR #707](#)), ESPResSo 4.2.2 + pyMBE 0.8.0 ([PR #782](#)), SciPy-bundle 2023.11 ([PR #776](#))
- Many PRs on GPU support (see dedicated slide)
- PRs on support for dev.eessi.io (see dedicated slide)

Progress update: software layer (2/3, GPU)

Recent active open PRs + issues for GPU support:

- Redesign of approach
 - `/cvmfs/.../2023.06/software/linux/x86_64/amd/zen3/accel/nvidia/cc80/`
 - Only zen2 (AMD Rome) + cc80 (NVIDIA A100) supported for now
- Accelerator detection added to archdetect ([PR #767](#))
- End-user support added for bash script ([PR #767](#)) and EESSI module ([PR #781](#))
- Initial software added
 - cuDNN ([PR #772](#)), ESPResSo ([PR #748](#)), LAMMPS ([PR #711](#)), *waLBerla* ([PR #780](#))
 - Rebuilds of previous packages
- Logistics of testing GPU builds a concern (due to cost and complexity)
- No sanity check to confirm compute capability ([issue #92](#))

[Kenneth, Thomas, Richard, Pedro, Bob, Lara, Caspar, Satish, Xin, Alan, ...]

Progress update: software layer (3/3)

Highlights and PRs on dev.eessi.io:

- Separate CVMFS repository with development builds, already accessible and with deployed software
- Example repository with first installations:
 - ESPResSo dev build ([PR #1](#))
 - LAMMPS small build with OBMD ([PR #6](#))
- Software-layer PRs for dev.eessi.io:
 - Tweak installation scripts to support dev.eessi.io installations ([PR #771](#))
 - [WIP] Ensure installations land in project subdirectories ([PR #804](#))
- Currently only for AMD Rome (zen2)
- See also docs [PR #321](#)

EESSI production repository

eessi.io/docs

`software.eessi.io` is the **production-ready EESSI repository**

Version 2023.06 is being populated with software via [PRs to software-layer repo](#) + build-and-deploy bot

- 8 supported CPU targets: see eessi.io/docs/software_layer/cpu_targets
- 3 more CPU targets being added: zen4, a64fx, (sapphirerapids)
- Initial support for NVIDIA GPUs is in place, see eessi.io/docs/gpu
- **Currently: 890 software installations per CPU target**
(+159 in Sept+Oct'24)
 - 456 different software projects (+68),
8,066 software installations (across 8+2 CPU targets, +1,561)
- Current focus:
 - Providing optimized software installations for AMD Genoa (Zen4) + A64FX (+ Intel Sapphire Rapids)
 - Adding more (CUDA) software, processing incoming contributions, fixing broken builds/test suites, ...

Modulefile for initializing the EESSI stack

- New method for initializing the EESSI stack via a Lua module file
- Now available in `/cvmfs/software.eessi.io/init/modules`
- In some sense better than `init/bash` script, since it's reversible (via `module unload`)
- If you already have Lmod, you can simply do:

```
module use /cvmfs/software.eessi.io/init/modules
module load EESSI/2023.06
```

- **Please give it a try, and report any issues**
- eessi.io/docs/using_eessi/setting_up_environment/#loading-an-eessi-environment-module

Bot for building + deploying software layer

<https://github.com/EESSI/eessi-bot-software-layer>

- September-October'24
 - allow customizing Slurm submit options [PR#277](#) (community contrib)
 - use github API for downloading the diff [PR#278](#)
 - add docs on private repos [PR#279](#)
 - add accelerator value to job cfg and extend PR comment [PR#280](#) & [PR#282](#)
 - release [v0.6.0](#)
- Ongoing work
 - Installing bot on clusters with support for GPUs
 - Improve deployment (ingestion efficiency, single approval PR, flexible tasks)
- Side note: over 27,000 Slurm jobs have been submitted on AWS Slurm cluster (bot + test suite)

[Thomas, Bob, Kenneth, Lara, Pedro]

EESSI documentation

eessi.io/docs - GitHub repo github.com/EESSI/docs

Improvements to the EESSI documentation: ~24 merged PRs (+ 30 updates to software overview)

- Blog post about EuroHPC User Day 2024 ([PR #332](#))
- Blog post on using EESSI in CI ([PR #323](#))
- Blog post on EESSI being nominated for HPCwire Readers' Choice Awards 2024 ([PR #293](#))
- Updates on documentation on how to use EESSI ([PR #317](#))
- Updates on how to build on top of EESSI to use EESSI-extend ([PR #316](#))
- Slides for EESSI CASTIEL2 NCC Ambassador workshop ([PR #307](#))
- Use a time template in module documentation generation ([PR #256](#) + [PR #258](#))
- Page with overview on systems on which EESSI is available natively ([PR #303](#) + [PR #308](#) + [PR #309](#) + [PR #311](#) + [PR #312](#) + [PR #315](#))

EESSI documentation

eessi.io/docs - GitHub repo github.com/EESSI/docs

- Auto-updates to overview of available software: eessi.io/docs/available_software/overview
- New section with overview of systems where EESSI is known to be available already:
eessi.io/docs/systems
- Additional blog posts: eessi.io/docs/blog

EESSI test suite

eessi.io/docs/test-suite - github.com/EESSI/test-suite

ReFrame

Test suite v0.4.0 release

- Lammmps, PyTorch, CP2K
- Various bug fixes & other updates, full release notes [here](#)

Post-release merges

- eessi_mixin class: facilitate easier creation of portable test ([PR #177](#))
 - Nearly every test in EESSI test suite should inherit from this (except special cases)
 - Provides feedback if child classes are missing information
- MetallWalls ([PR #164](#))

Sponsored AWS credits

- Ask in #aws-resources Slack channel to get access!
- ~\$6,016 + \$7,441 “spent” in Sept’24 + Oct’24 on Stratum-1 servers, monitoring, demos, sources.easybuild.io, debugging (build) issues, Slurm clusters (build bot), testing on GPU nodes, ...
- **Bulk of consumed credits due to EESSI build-and-deploy bot**
- Regular sync meetings with AWS - **more sponsored credits have been provided for coming months**

EESSI AWS credits spent (per month)

EESSI AWS credits (Sept'24 - \$6,016)

EESSI AWS credits (Oct'24 - \$7,441)

Sponsored Azure credits

- Ask in #azure-resources Slack channel to get access!
- In Sept+Oct'24: €5,230+€3,811 worth of credits spent
- Used for: **Slurm cluster for bot (Zen4)**, Stratum-1 mirror servers, GitHub Runners, GPU nodes, ...
- Ongoing discussions to extend sponsored credits into 2025

EESSI Azure credits spent (per month)

Resource group name

Sept'24 (€5,230)

Resource group name

Oct'24 (€3,811)

CernVM workshop

CernVM-FS
CernVM File System

- 16-18 Sept 2024 at CERN (Geneva, Switzerland)
- <https://indico.cern.ch/event/1347727>
- Presentation by Thomas: *CernVM-FS makes software EESSI to use*
 - Slides available [here](#)
- General interest in EESSI:
 - EESSI being added to EGI
 - Some LHC experiments building software for aarch64 and riscv64 (experimental)
 - Interest in building their software on top of compat layer

EuroHPC User Day 22-23 Oct 2024 (Amsterdam)

- Presentation on MultiXscale and EESSI by Kenneth in *HPC ecosystem tools* session
- Live demo of EESSI at walk-in networking session
 - Raspberry Pi cluster running ESPResSo demo provided by EESSI
 - Contest to win a Raspberry Pi 5 starter kit
- [Link to blog post](#) with more details & pictures + links to slides

[Kenneth, Lara, Caspar, Satish, Thomas, Richard, Bob, Pedro]

Supercomputing'24

- 17-22 Nov 2024 in Atlanta, Georgia (US)

<https://sc24.supercomputing.org>

- **Birds-of-a-Feather session** on EESSI: Tue 19 Nov 12:15-13:15 EST

<https://sc24.conference-program.com/presentation/?id=bof126&sess=sess657>

Organised by Elisabeth/Helena/Jordi (HPCNow!) + Kenneth/Lara (HPC-UGent)

- **Presentation at Microsoft Azure booth** at SC'24 exhibit by Kenneth/Lara on Wed 20 Nov 14:40-15:00 EST
- + *some nice news which we can't disclose yet...*
- Maybe also some informal meetup of EESSI (+ EasyBuild) community?

Past/upcoming webinars on EESSI

- MultiXscale Ambassador Event: Introduction to EESSI (4 Oct 2024)
Recording available at <https://www.youtube.com/watch?v=Xf6KqSCIAqw>
- EPICURE webinar (Fri 15 Nov'24 14:00-15:30 CET)
Streaming Optimised Scientific Software: an Introduction to EESSI
<https://epicure-hpc.eu/2024/10/17/webinar-streaming-optimised-scientific-software-an-introduction-to-eessi>
- NRIS talks on EESSI
 - 3 Oct 2024: Introduction to EESSI
https://documentation.sigma2.no/training/nris_talks/2024-10-03-nris-talks.html
 - 28 Nov 2024: How to build on top EESSI using EasyBuild
https://documentation.sigma2.no/training/nris_talks/2024-11-28-nris-talks.html

Frequency of EESSI update meeting

- From now on EESSI update meetings will be **bi-monthly**, only in odd months
- Next meetings:
 - Thu **9** January 2025 14:00 CET
 - Thu 6 March 2025 14:00 CET
 - Thu 1 May 2025 14:00 CEST
 - Thu 3 July 2025 14:00 CEST
